Cutting Instructions:

The original system requires cutting at the rear silencer. There is a dimple on the pipe to show the cut point that BMW use, we've highlighted it on the image.

The original system also requires cutting at the front of the system. Measure 525mm from the resonator weld towards the front of the car for your cut point.

Ensure you remove any burs from the pipework that may prevent the Scorpion pipes from fitting.

If you are unsure please contact us before cutting your system.
