Notes	Where not supplied use original fittings. Original system requires cutting.	Features	Pipe Diameter:- 70mm

Estimated Fitting Time: 2 Hours

We recommend removing the original exhaust from the car before cutting.

Locate the sets of indentations on both sides of the original system.

Cut the system through the middle pair of indentations. Once cut de-bur the edges and re-fit the rear to the car.

NOTE: If fitting at the same time as the Scorpion Half System you do not need to make any cuts to your original exhaust.
